

PILLOW BLOCK BEARINGS

If quiet shaft rotation is important in your product line, check out Triangle Manufacturing Company's pillow block bearings.

Standard pillow block bearings are available with:

- Miniature, medium, extra strength and heavy duty mountings
- Oil cups or grease fittings
- Sintered iron, bronze and nylon ball units

Expertly designed and manufactured, featuring:

- Self-aligning ball and socket design that compensates for surface mounting irregularities
- Self-metering lubrication system, including a factory-filled, large lubricant reservoir and capillary feeder system for mountings ordered with oil cups (grease fittings shipped dry)
- Precision bores supplied to customer specification, accurately sized and straightened to eliminate variations occurring in press-fitted parts

Triangle pillow block bearings are used around the world in:

- Business machines
- Food processing equipment
- Small conveyors
- Vending machines
- And, other applications where quiet rotation is needed

MINIATURE MOUNTINGS

Miniature pillow block mountings are a smaller version of the Triangle strap-type, unitized pillow block mountings.

HEAVY DUTY MOUNTINGS

The straps for BJ and BK Series are pressed from strong 11-gauge steel. Strength of these sturdy mountings approaches cast iron pillow blocks. For especially heavy duty use, these bearings are also supplied with cast iron bearing ball units.
